TESTING SCENARIOS

User tasks

1. Visitor enters a city on Search and views all results. Quits. [S2]
2. Visitor filters by e-scooter only. Quits. [S2]
3. Visitor sets city, vehicle type and max price, then opens a listing. Quits. [S2, S3]
4. Visitor clicks Request to book while logged out, signs up as Rider, returns to the listing. [S3, S1]
5. New user signs up as Both and completes a search unaided. [S1, S2]
6. User logs in with a wrong password, sees an error, retries correctly. [S1]
7. Rider picks dates and submits a booking request. Quits. [S3]
8. Rider picks dates overlapping a blocked period and sees them rejected. [S3, S7]
9. Rider requests own vehicle and is blocked. [S3]
10. Renter approves a request. Rider pays with test card 4242. Booking becomes Confirmed. [S8, S4]
11. Rider pays with a declined card, sees error, booking stays Requested. Retries successfully. [S4]
12. Renter declines a request. Rider sees status Cancelled. [S8, S5]
13. Renter creates a listing with photos, category, price, then publishes. [S7]
14. Renter adds a blocked date range and pauses the listing. [S7]
15. Rider and Renter exchange messages on a confirmed booking. [S6]
16. User opens booking history and filters by Completed. [S5]
17. Rider leaves a 5-star review after a completed rental. Renter then reviews the Rider. [S5]
18. Rider submits a request and sees the waiting state on booking detail. [S3, S9]
19. Rider cancels a requested booking. Status becomes Cancelled. [S9, S5]
20. Rider cancels a confirmed booking before it starts. [S9]
21. Renter marks a finished rental Completed, so both users can review. [S9, S5]
22. Renter adds a vehicle with category and details, then creates a listing from it. [S10, S7]
23. Renter edits a vehicle and pauses its listing. [S10, S7]
24. User views received ratings, edits home city and saves. [S11]
25. User logs out and returns to Search as a visitor. [S11, S2]
26. Visitor applies filters with no matches, sees the empty state, clears filters. [S12, S2]
27. User signs up with an already registered email and sees the error. [S12, S1]
